

Year Group: 1

Term: Summer 2

Long Term Plan Theme:

From Field to Fork (Good to Grow)

Curiosity (Engagement)

We will develop our curiosity through asking questions and sometimes discovering our own answers through researching ideas.
We will develop our curiosity through improving our listening and communication skills.

Teamwork / Independence

We will ensure that we will work well together in groups and independently during our learning.

Resilience

We will develop our resilience by approaching all learning tasks with our best effort. When choosing challenges we will learn that we only make progress by making mistakes.

Empathy

We will focus on our friendships and empathy and, along with our values, these will underpin our daily lives.
We will build our skills in empathy by listening to others, face to face and through stories thinking about feelings and emotions.

As mathematicians

As mathematicians, we will practise adding and subtracting quantities in our food preparation. We will practise measuring and reading scales accurately. We will practise using fractions, as we divide quantities of ingredients and proportions.

As readers and writers

As readers and writers, we will be retelling stories about growing and creating our own versions of these stories with an exciting twist.

As scientists

As scientists we will study the basic needs of all humans and the importance of exercise and eating. We will understand the importance of plants for humans (fruit, vegetables, trees) and the features of different plants classifying using scientific vocabulary.

As historians

As historians we will link our skills to science by placing our physical development into a chronological order.

As geographers

As geographers we will link physical and human features of different locations to understand where fruit and vegetables come from (using a map to identify areas)

As computing experts

As computing experts, we are learning to use simple programs to create motion and pictures.

As designers

As designers we will master practical skills including cutting, peeling and grating ingredients, measuring and weighing to create a delicious masterpiece.

As artists

As artists we will take inspiration from Arcimboldo to create portraits made from fruit and vegetables and create woven baskets using a range of materials for our fruit (2D collage picture)

As musicians

As musicians we will be consolidating our sense of rhythm and timing and continuing to develop our bank of songs.

As athletes

As sportspeople we will be sending and receiving objects and balls using our bodies and other PE equipment. We will also be preparing for events linked to sports day.

As religious experts

As religious experts, we will understand that Jesus told parables to teach people about God and his kingdom and make connections between parables and what Christians believe.
