

Year Group: 5

Term: Autumn 2

Long Term Plan Theme:

Land of the Free

Curiosity (Engagement)

We will work in a variety of practical and reflective ways to deepen our understanding and encourage questions.

Teamwork / Independence

We will take responsibility for our own learning in both independent and collaborative activities. As part of a team, we will learn to listen to others ideas as well as contributing our own.

Resilience

We will continue to focus on becoming resilient learners. We will use the success criteria to check our own progress and work towards improvements.

Empathy

We will learn to put ourselves in others' shoes in order to understand how our actions affect others.

As mathematicians

We will be revisiting and expanding our knowledge of multiples, factors, square and cube numbers. We will also investigate area and perimeter, linking both to real world problem solving and reasoning challenges.

As writers

We will be focusing on non-chronological report writing (related to our science topic). Also, we will be writing Christmas legends.

As religious experts

We will explore the concept of light as a theme during Christmas and Christians' belief of Jesus as 'the light of the world'.

As scientists

We will be learning about our solar system and how the Sun, Earth and Moon relate to each other.

As computing experts

We will be using the internet to research some human and physical features of the USA and honing our presentation skills in PowerPoint to present our findings.

As geographers

We will be studying the continent of North America its physical and human features. We will compare and contrast some of these features with those in the United Kingdom.

As artists

We will learn how to use perspective in order to create landscape drawings and paintings of some of the parts of America we will learn about in geography.

As athletes

We will be becoming more confident swimmers as we visit Surrey Sports Park for our swimming lessons.

As musicians

We will improve our harmonic development using doh and soh and deepen our understanding of harmonics

As linguists

We will be focussing on becoming more independent learners and risk takers. We will use prior knowledge of the language and encourage learners to use language they have been exposed to previously to produce more varied and interesting pieces of work.
