Safeguarding Update

May 2019 Issue 15

You know your kids. We know media and tech. Together we can build a digital world where our kids can thrive.

Common Sense offers expert reviews, objective advice, helpful tools about media and technology.

Media and technology are at the center of kids' lives every day. From a very young age, kids use technology at home and at school to connect with friends and family and to document their lives and create digital content of their own. With more of life happening online, what catches kids' attention isn't always what's best for them, and what companies do with their personal information isn't always clear.

Common Sense Media rates movies, TV shows, books so parents can feel good about the entertainment choices they make for their kids. Our timely parenting advice supports families as they navigate the challenges and possibilities of raising kids in the digital age.

Common Sense Education supports schools with resources needed to empower the next generation of digital citizens.

Common Sense Kids Action partners with policymakers and business leaders. Our advocacy platform highlights legislation related to technology to keep parents and educators informed. We identify solutions for digital well-being and champion legislation that supports the youngest and most vulnerable users: kids.
