

Worplesdon Primary School – Weekly Update

Dear Parents / Carers,

Friday 13th March

As mathematicians we have been counting in 2s up to 50 from zero forwards and backwards. As an extra challenge we asked the children to count in 2s from an odd number. We have made number lines using numicon and worked out the numbers that are missing.

As writers we have made up our own stories based on Hector the Hermit Crab. Our focus is still conjunctions and we have been adding adjectives and adverbs to our sentences too.

As phonics experts we have been adding sound buttons to words and blending these sounds to read. Please keep practicing and using sounds as you help your child to read at home.

Here are some words for you to sound button with your child at home. Are they real or alien words?

Stomp
spook
string
spuchy
speech
stousher
sharchear
chairman

As Geographers we have been discussing human and physical features and have started our 3D maps with physical features added.

As designers we have been planning our finger puppets ready to develop our sewing skills over the next few weeks.

As writers we have been practising forming some of our one armed robot letters (r, n, m, h, b).

Don't forget to keep the homework tasks coming in to school; Blackbirds class will be doing their class assembly all about Easter and it would be lovely to have some Easter gardens to show on March 27th!

Many thanks

The year 1 team.
