

Year Group: 1

Term: Summer

Long Term Plan Theme:

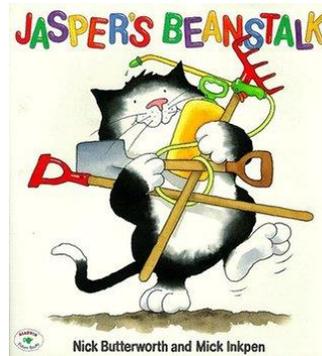

Ready Steady Grow!

Curiosity (Engagement)

We will develop our curiosity through investigating plants and minibeasts in Science, objects and people from the past in History and famous artists in Art. We will be asking lots of questions to find out more about things.

Teamwork / Independence

We will work as teams with our families to complete work from school and to look after each other make sure we are having fun together. We will become really independent by using google classroom and completing more work on our own now we know how it all works.

Resilience

We will develop our resilience by continuing to work from home for a while. We are all showing amazing resilience and will keep practising this as we start back for the Summer term.

Empathy

We will build our skills in empathy by talking to our families about how they feel and supporting each other to keep positive. We can display empathy in other ways such as checking on elderly neighbours and putting food in the food bank to help those who can't get to the shops.

As mathematicians

As mathematicians, we will continue to develop our knowledge and understanding of capacity and be using positional and directional language to solve problems. We will be learning about fractions and how to find these and finally measuring lengths using centimetres.

As readers and writers

As readers and writers, we will be looking the story Jasper's Beanstalk and use this to write our own amazing sentence starters in the story. We will be practising using all our other writing tools and finally moving onto using all our non-fiction writing skills to create non-fiction writing about minibeasts.

As scientists

As scientists, we will be investigating plants and minibeasts. We will be exploring wild plants and trees in our environments and investigating minibeasts that live near us. We will be hunting for minibeasts, looking at their micro habitats and maybe building minibeast habitats of our own.

As historians

As historians, we will use our skills to investigate objects from the past and what they might be used for. We will be looking at the Victorians and exploring their inventions and toys. We will even make our own Victorian toy.

As computing experts

As computing experts we will be continuing to develop our understanding of data handling and drawing on our maths skills to find information to put into the computer program 2count.

As artists

As artists, we will be exploring the work of the famous artists Arcimboldo, Van Gogh and Matisse and creating our own pieces based on their work. We will also be practising our drawing skills and using them to create different effects.

As athletes

As athletes we will be keeping ourselves fit by taking part in daily exercise at home using sport people on the internet or going out for daily exercise in our gardens or on a walk.

As religious experts

As religious experts, we will learn about Christian places of worship and the stories from the Bible.
