

Worplesdon Primary School – Weekly Update

Friday 9th October

Dear Parents / Carers,

This week we have had a very productive week and the children's stamina is really returning, allowing them to demonstrate just how much they have learnt over the past 5 weeks.

In maths this week, the children moved on to the formal method of multiplication. The children continue to show great resilience when approaching challenges and our work really highlighted the importance of times tables in so many different elements of maths. Please continue to use Timetables Rockstars and if you need help accessing this at home, please contact your child's teacher.

In English, we have started a new unit of writing based on Perseus and Medusa. The children thoroughly enjoyed describing the gruesome beast and are looking forward to creating their new baddies next week!

In art, the children's masks are continuing to take shape and they are really demonstrating how creative they can be with just newspaper and PVA glue.

Just as a reminder, please continue to send children into school with an extra pair of shoes. On PE days, these can be the children's school shoes so that we can continue to use the field throughout the week.

Finally, parents evening is fast approaching and the booking system is now live so please choose an available slot for our virtual meetings.

Hoping you have a great weekend,

Mr Clifton, Miss Dunne and Mr Djadali
