

Year Group: 1

Term: Spring 1

Long Term Plan Theme:

Our Wonderful World

Curiosity (Engagement)

We will develop our curiosity through investigating materials in Science and through exploring our world, looking at new places and all the oceans and continents we have.

Teamwork / Independence

We will continue to learn about our school values and practise these every day, including partner talk, working with others and sharing. We will continue to be 'mini teachers' when supporting our friends with their learning and always try ourselves before asking an adult for help.

Resilience

We will develop our resilience by approaching all learning tasks with our best effort. When choosing challenges we will learn that we only make progress by making mistakes. We will have open ended science investigations which mean we need to 'try, try and try again.'

Empathy

We will build our skills in empathy by listening to others, face to face and through stories thinking about feelings and emotions. Through our Learning for Life curriculum we will be exploring the story of The Colour Monster and working on how to recognise and cope with different feelings and support others with their feelings.

As mathematicians

As mathematicians, we will be learning about place value to develop an understanding of how many tens and ones a 2-digit number has. We will continue to work on our addition and subtraction skills and understanding the relationship between these and finally learn about height and length.

As readers and writers

As readers and writers, we will be looking the story Handa's Hen and learning about verbs and adverbs and how to use these in our writing. Our next story will be Lost and Found where we will learn about conjunctions to add more to our sentences. As readers we will be continuing to learn our new Phase 5 sounds.

As scientists

As scientists, we will continue investigating materials. We will be testing materials to see whether they float or sink and using our results to build floating rafts.

As geographers

As geographers, we will be learning about the world we live in. We will learn about the oceans and continents and compare a small part of Africa to our small part of the UK. We will be thinking about why places are hot and cold and talking about the equator.

As computing experts

As computing experts, we will be developing our own animated stories using purple mash. We will continue to learn about safety and how to keep ourselves safe online.

As artists

As artists, we will be exploring printing and how to use different types of printing to create a final picture. We will be developing our drawing skills and looking at the work of some famous artists, including Arcimboldo.

As musicians

As musicians we will explore pitch and understand relationship between pulse and rhythm.

As athletes

As PE experts, we will be developing our skills in sending and returning threw throwing skills and games. We will develop this to include hit and catch skills with more equipment.

As religious experts

As religious experts, we will learn about why the Bible is an important book for Christians.
