

# Quizzing

## Overview

As computing experts, we will be learning how to design and make different types of quizzes using Purple Mash. We will be making:

- Picture-based quizzes for young children.
- Exploring grammar quizzes
- Making a quiz that requires the player to search a data-base
- Making a quiz to test parents or teachers.

## Key vocabulary

**audience** – People who watch a performance or use a resource.

**audio** – Recorded sound

**Case-sensitive** – Differentiating between capital and lower-case letters

**Clone** – To make a complete copy of something.

**Cloze** – A test in which words are removed from a text and replaced with spaces. The learner has to fill each space with the correct words.

**Preview** – To see what something (or part of something) looks like before committing to it being the final version.

**Quiz** – An activity in which participants answer questions and receive a score dependent upon correct answers

## What factors do you need to consider when creating a quiz?

The intended audience; age and reading ability and interests.  
The aim of the quiz; is it for fun like a game, or to make sure that the user has learnt something?

## Apart from questions, what else does a quiz need to contain?

A title screen and instructions for the user. Feedback for the user (some quizzes). Time limits (some quizzes). Images for interest as well as part of the questions

## Name the different question types in 2Quiz.

- Sequencing
- Grouping and Sorting
- Text based
- Multiple-choice
- Labelling
